

CD 705

Powerful external Multimedia display in 16:9 format

Highlights:

- Supports the uncompressed BMP image format
- Stand with VESA standard for easy deployment
- Offers various character sets
- Graphic display area for advertising messages

Traceable transactions & individual advertising messages

The QUORION display CD 705 is an innovative product, which represents an alternative to the current 2-line customer displays. The CD 705 interactively promotes your products and deals. Use a standard SD card to store your images and automatically present them via a slideshow at the point of sale during transactions.

The CD 705 provides superior image quality, while you show your images to your customers. In addition, you can run marketing texts alongside your pictures as well as show transaction related messages.

Run your own customized advertisement for free with the CD 705!

The screen design of the display can be customized. For example, the font and background colors can be set and the display duration of the slide show can be defined.
