# ENHANCE THE OPERATION OF YOUR BUSINESS WITH THIS FULLY-FEATURED, AFFORDABLE ECR

## Item Accuracy and Increased Clerk Productivity

Equipped with 500 standard PLU's. The CE-3700 automatically displays the item price without the need for unit price or department product entry to ensure pricing accuracy. The CE-3700 clerk interrupt system allows multiple clerks to operate in the same transaction,

with each clerk being properly credited for the item they sold. Commission rates (max. 2) can be calculated on items sold and reported by clerk. Commission calculation can increase productivity, expand your capabilities and at the same time simplify procedures.

## Accurate Sales Information and High Quality/Speed Printing

Conveniently divide your 12 to 40 departments into unique (food stampable, non-sale, negative, taxable and non-taxable) and accurate (Grocery, Dairy, Deli, Lottery etc...) major categories! These departments allow you to

track and analyze your sales by product type. Combining the flexible department functionality with the CE-3700 durable, high speed impact printer adds up to an efficient, affordable and reliable business management tool.

## User Definable Keyboard

The CE-3700 Keyboard layout is programmable allowing the design of the keyboard to ensure an ease of operation. Finalize (cash, check, change, credit 1-4) function (quantity for, cancel, discount, coupon) keys can be

conveniently placed on the keyboard. Departments may be strategically placed. Locating frequently used keys in accessible positions and program those keys as single item entries to increase customer through-put.
